### COMPANY

Fondata nel 1949, CRISTINA Rubinetterie è punto di riferimento, in Italia e all'estero, nel settore della rubinetteria. Fondata da Ezio Cristina a Gozzano (Novara), l'azienda cresce in contemporanea con l'evolvere del distretto della rubinetteria - dove artigianalità, industrializzazione, ricerca e design si compenetrano fra loro - e si caratterizza fin da subito per la produzione radicata nel territorio e lo spirito

imprenditoriale. Nel 1968 CRISTINA Rubinetterie è tra le prime ad introdurre in Europa il miscelatore termostatico e nel proporre una gamma di cento colorazioni superficiali. Negli anni '80, è fra le prime al mondo a introdurre il miscelatore monocomando.

*Founded in 1949, CRISTINA Rubinetterie is a point of reference in the taps and fittings sector in Italy and abroad. Ezio Cristina founded the company in Gozzano (Novara): the company grew with the evolution of the tapware world district - where craftsmanship, industrialisation, research and design permeate one another - and was immediately characterised by an entrepreneurial spirit and a production rooted into the territory. CRISTINA Rubinetterie was among the first to introduce the thermostatic mixer in Europe in 1968 and offer a range of one hundred surface colours. In the 1980s, the company was one of the first to introduce the single lever mixer worldwide.*

### SAVOIR FAIRE

Negli anni '80 l'azienda effettua un cambio di stato: passa da fornitore di semilavorati a produttore. Nel contempo acquista SILFRA, realtà specializzata nella produzione di colonne di scarico e rubinetteria elettronica e temporizzata. Un altro step significativo avviene nel 1994, con la decisione di produrre in proprio le cartucce del miscelatore monocomando, scelta che permette un alto grado di sicurezza nel controllo del processo produttivo e nella qualità dei prodotti. Alla fine degli anni '90 si apre all'apporto creativo dei designer, italiani e internazionali. Nel 2007, viene ampliato il polo logistico di Gozzano, con magazzino totalmente automatizzato. Dal 2003 viene introdotto l'utilizzo dell'acciaio inox (garantito dal marchio di qualità rilasciato dal Centro Inox) a cui l'azienda ha dedicato un'intera divisione. Questa si rivela subito la soluzione ideale per i prodotti bagno e cucina sia per l'aspetto estetico che per le caratteristiche intrinseche dell'acciaio inox (igienico, facile da pulire ed eco-friendly, in quanto più dell'80% è ottenuto da riciclo). L'azienda è socia del Green Building Council Italia, che utilizza il rating Leed (Leadership in Energy and Environmental Design) come sistema di valutazione della sostenibilità degli edifici.

*In the 1980s, the company underwent a change moving from being a supplier of semi-finished products to being a manufacturer. In the meantime, the acquisition of SILFRA took place, a company specialised in the production of drain columns, electronic and time-controlled taps and fittings. Another important step took place in 1994 with the decision to start the in-house production of cartridges for the single lever mixer, a choice allowing a high degree of safety in the control of the production process and in the quality of the products. The end of the 1990s is when creativity came into play with the arrival of Italian and international designers, while in 2007 the logistics centre of Gozzano was enlarged*

*with a fully automated warehouse. The use of stainless steel (guaranteed by the quality mark issued by Centro Inox) was introduced with the company dedicating an entire division to it in 2003. This immediately appeared to be the ideal solution for bathroom and kitchen products both for the aesthetic element and for the intrinsic characteristics of stainless steel (hygienic, easy to clean and eco-friendly because over 80% is obtained from recycling). The company is a member of the Green Building Council Italia that uses the Leed rating (Leadership in Energy and Environmental Design) as a system to assess the sustainability of buildings.*

## CRISTINA DESIGN LAB

Il forte investimento di capitali e risorse umane nell'attività di ricerca e sviluppo è poi un ulteriore tratto fondante in CRISTINA Rubinetterie, dove opera il CRISTINA Design Lab, dipartimento di Engineering considerato uno degli asset aziendali. E' anche grazie all'apporto di CRISTINA Design Lab, che l'azienda può competere con le sfide del mercato globale, continuando a mantenere ogni aspetto della produzione nei propri quattro siti produttivi. Un Made in Italy che viene rafforzato da una forte presenza sui mercati esteri, da dove proviene il 65% del fatturato, con una presenza in oltre 60 Paesi, dall'Europa (Francia, Svizzera, Spagna, Regno Unito, Germania, Olanda e Austria) al Nord Africa, Estremo Oriente e Stati Uniti.

*The strong investment of capital and human resources in research and development activities is a further founding feature of CRISTINA Rubinetterie with the CRISTINA Design Lab, the Engineering Department considered as one of the company's assets. It is also thanks to the contribution of the CRISTINA Design Lab that the company can compete with the challenges of the global market, continuing to maintain every element of production in its four production sites. A Made in Italy line of products, empowered by a strong presence on foreign markets: 60 countries, from Europe (France, Switzerland, Spain, United Kingdom, Germany, Holland and Austria) to North Africa, the Far East and the United States that generate 65% of the turnover.*

## SHOWROOM & RESTYLING

Nel 2017 viene inaugurato lo showroom proprietario di Milano, progettato da Naomi Hasuike dello studio Makio Hasuike & Co, quattro vetrine che affacciano su via Pontaccio, nel cuore di Brera. Una decisione presa per implementare il dialogo con progettisti e architetti, che trovano nello showroom un luogo dedicato per conoscere le collezioni del marchio e per incontri di

lavoro e progettualità, ma anche per proporre eventi. Nel giugno del 2017, l'azienda annuncia la propria acquisizione da parte del Gruppo Caleffi, leader della produzione Made in Italy di componentistica per impianti di riscaldamento, condizionamento e idrosanitari. Un'importante operazione, volta a garantire la coerente continuità del marchio e la sua ulteriore crescita a livello internazionale. Il 2020 per CRISTINA Rubinetterie è un anno di altre importanti novità: nascono il nuovo logo e nuove collezioni di miscelatori. Oltre alla gamma ampia e diversificata di prodotti a catalogo, l'azienda conferma e implementa la possibilità di sviluppare soluzioni su misura dal punto di vista delle dimensioni, delle finiture e dell'utilizzo, così da soddisfare le esigenze di progettazione.

*The proprietary showroom, four windows overlooking via Pontaccio, in the heart of the Brera district, was designed by Naomi Hasuike from the Makio Hasuike & Co designer studio and was inaugurated in Milan in 2017. A decision made with the aim of implementing the dialogue with designers and architects who now have a dedicated area to events and to learn about the new collection or attend business and design meetings. In June 2017, the company announced that it had become part of the Caleffi Group, a leader in the Made in Italy manufacture of heating, air conditioning, water and sanitary systems. An important operation aimed at guaranteeing the continuity of the brand and its further growth at an international level. The year 2020 is one of important novelties for CRISTINA Rubinetterie with the new logo and the new mixer collections. In addition to a wide and diversified range of products in its catalogue, the company confirms and implements the possibility to develop tailor-made solutions in terms of dimensions, finishes and types of use to meet design requirements.*

## THERMO UP

I comandi termostatici THERMO UP gestiscono l'uscita dell'acqua attraverso semplici pulsanti. Oltre all'apertura e alla chiusura dell'erogazione, i pulsanti ruotando regolano la portata dell'acqua. L'intera gamma THERMO UP offre la possibilità di combinare contemporaneamente le diverse uscite d'acqua.

The THERMO UP thermostatic dials allow to control the water by simply pressing the buttons. The push buttons do not only turn water on and off, but also control the flow when you turn them. The different outlet options can be combined and used simultaneously in all the products of the THERMO UP collection.
